RULES FOR BURNING CORPSES AT THE BURNING GHATS.

1. The Sub-Registrar of every municipal burning ghât shall live in the immediate vicinity of the ghât, and shall cause a board, containing his name and official designation, to be placed in some conspicuous portion of his dwelling house.

2. Every corpse brought to a burning-ghât, without being accompanied by a certificate in the form prescribed in section 190, Act II (B.C.) of 1888, shall be examined forthwith by the Sub-Registrar, without touching the corpse, who, upon being satisfied that death has resulted from natural causes, shall enter, without fee, in the register kept for the purpose, the particulars specified in the abovementioned form, every such entry being made in order from the beginning to the end of the book. When a corpse is accompanied by a certificate from a Registrar or Medical Officer, the Sub-Registrar shall file such certificate, and then permit the corpse to be burnt.

3. If the Sub-Registrar has any reason to suspect that death has not resulted from natural causes, he shall send immediate intimation thereof to the nearest police-station, and in the meantime withhold permission to have the corpse burnt. Where there is no reason for such suspicion, the corpse shall be burnt within four hours after its arrival.

4. The Sub-Registrar shall see that no corpse, or portion of a corpse, shall on any account be allowed to be thrown into the river. He shall take particular care that no corpse, or portion of a corpse, except the navel, shall remain without being completely reduced to ashes, or be removed in any other condition. The charge to be made for the burning of a body will be on a scale laid down by the Commissioners.

5. The Sub-Registrar shall submit to the Health Officer a weekly return every Monday of all deaths registered at the ghât. This return shall contain the particulars specified in schedule II of Act II (B.C.) of 1888, and shall be accompanied by the certificates granted by the several Registrars or medical men during the week separately arranged in different bundles according to the several wards to which they relate.

6. The Sub-Registrar shall be very careful to see that all the belongings of a corpse, such as clothes, mats, bed and bedding, &c., brought with the corpse, are burnt, and none of the aforesaid things shall on any account be allowed to be removed from the ghât by the Domes or any other person. This prohibition shall not apply to any shawl or other valuable apparel brought with dead bodies.

7. Corpses may be burnt both during the day and night, but the Sub-Registrar in charge of the ghât shall see that the ashes and sweepings

are removed daily, and that the burning-ghât is always kept clean.

8. The Sub-Registrar shall allow persons to burn the corpses of their friends and relatives, each according to the rites of his religion, without any interference.

9. No child or fœtus is allowed to be buried on the riverside.

10. The Domes in charge are strictly prohibited to drink spirituous liquors within the burning-ground enclosure, or to be in a drunken state when on duty. The Sub-Registrar shall see that this rule is strictly enforced. He shall also remove from the burning-ghât all persons who are drunk or disorderly.

11. All persons connected with the burning-ghât must be civil and attentive to those who come there to have dead bodies burnt.

12. All remains of corpses, which have been dissected, as also those upon which a Coroner's inquest has been held, shall be brought to the ghât in a closed vehicle and burnt at night.

13. The contractor, who supplies the necessaries for burning corpses, shall not be allowed to charge more than the rates specified below.

14. The Brahmin shall not demand any fee, gratuity or reward other than that authorized by the Commissioners for the performance of the necessary religious rites, and it shall be his duty to attend immediately on being sent for at all hours of the day or night, and to officiate as priest and cause the performance of the ceremony, and he shall be considered to be a servant of the Commissioners for the purpose of this rule.

15. The Brahmin shall on no pretence enter within the walled enclosure of the burning-ground, except when called by the relatives of deceased persons to officiate as priest, nor shall he remain therein after his services are completed.

16. Should the Brahmin demand any fee, reward or gratuity of any kind whatever in excess of the fee fixed in the tariff, or enter the enclosure except when sent for, or remain therein after his services have been completed, or after he has been required by the Sub-Registrar or other officer of the Municipality to quit the same, or fail to attend when sent for, he shall be liable to dismissal at the discretion of the Commissioners and to be ejected from the burning-ground. Provided always that no person coming to burn a corpse will be prevented from bringing with him his family priest should he prefer to have the cremation ceremony performed by him. In such a case, however, the party who brings his own priest to the burning-ground shall be bound to allow the Brahmin his usual fee.

17. The contractor shall at all times keep on hand a sufficient supply of fuel and the other necessary articles named in the tariff; should he fail to do so, or neglect, or refuse to supply the same at any hour of day or night, or fail to keep his shop open at all times for the purpose of supplying the same, or use false or short weights, or supply inferior or unsuitable articles or create any disturbance within the limits of the Commissioners' lands, his license shall be cancelled, and he shall be summarily ejected from the land and be further liable to criminal prosecution as a trespasser.

18. Persons coming to the ghât for burning dead bodies shall be bound to purchase all the articles named, and the quantities specified in the tariff, from the contractor. But they will be at liberty to provide themselves with whatever else they may require for cremation, as also all the articles therein named but in excess of the quantities specified in the tariff, or, when the contractor fails to supply them, from wheresoever they like; and the contractor shall not on any account interfere with persons bringing articles for burning dead bodies from outside.

REVENUE DEPARTMENT.

A Dictionary of the Economic Products of India.
By DR. GEO. WATT, C.I.E.,
Reporter on Economic Products.

Published under the authority of the Government of India in the Revenue and Agricultural Department.

The first two volumes of this work are now ready for issue, and intending subscribers are invited to register their names with the Superintendent of Government Printing, Calcutta.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular, and European names; habitat or source; history; properties and uses, both chemical and industrial; trade statistics; markets, &c. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross references so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks, and with a reference to the original publication. Numerous contributions have, however, furnished the results of new discoveries, and confirmed the vernacular names; so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal pages; Volume II embraces the letter C in 689 pages; Volume III is in course of preparation, and will contain the letters D, E, F, and G. The whole work will, it is expected, be completed in six volumes by 1891; but a seventh volume may also be issued consisting of an index to all the vernacular and other names contained in the Dictionary; and this as a work of reference, it is hoped, may prove of considerable value.

The price to subscribers will be in India Rs. 30 and in England 2 guineas, *payable in advance*, for the complete set An extra charge for packing and postage will be made for the set—in India, at 8 annas per volume, and for England at 2 rupees 6 annas per volume.

For copies bound in half calf or half morocco, Rs. 6 and 8 shillings respectively will be charged extra for the whole sets.

****No copies will be issued to non-subscribers till the work is complete, and no single volume will be sold separately. The price to non-subscribers will be Rs. 45 in India, and 3 guineas in England, exclusive of packing and postage.*

TRANSFER RULES FOR COLLEGES AND HIGH SCHOOLS.

GENERAL DEPARTMENT—EDUCATION.

Calcutta, the 20th May, 1890.

RESOLUTION.

READ again the following papers:—

Resolution recorded by the Government of India in the Home Department, No. $\frac{6}{37\ 1\text{-}383}$, dated the 17th August 1889.

Letter to the Director of Public Instruction, No. 76T—G, dated the 7th October 1889.

Transfer rules for colleges and schools appended to the Resolution recorded by this Government, dated the 13th September 1887.

Read also—

Letter from the Director of Public Instruction, No. 1995, dated 16th April 1890.

In the Resolution of the Home Department cited in the preamble, the Government of India suggested that inter-school rules, defining the conditions under which pupils should be allowed to pass from one school to another, should be extended to all schools aided by public funds, as a condition of the continuance of such aid; and that the Senates of the Universities should be invited to use their influence to procure the adoption of this system in schools and colleges which do not receive aid from Government. The essential points which it is necessary to secure by the inter-school rules were further stated to be, that without the consent of the Educational authorities a boy shall not be taken into a school who has been dismissed from another school for misconduct; that failing to pay his school fees in his former school shall debar a boy from admission to another school, except under similar consent of the Educational

authorities; and that, if received into another school, a boy shall not be placed in a higher class than the class he was in before leaving the other school, except at the beginning of a new term.

2. In accordance with the above views, the Director of Public Instruction has submitted revised inter-school rules, as appended to this Resolution, and has suggested that Circle Inspectors should be authorised to issue simplified rules based upon them to govern the transfer of pupils in middle and primary schools. The Lieutenant-Governor approves the rules and the suggestion of the Director of Public Instruction.

3. The Syndicate of the Calcutta University have expressed their desire to co-operate fully with the Education Department in the maintenance of discipline, and are prepared to give their careful attention to any case of infringement of the rules that may be reported to them.

ORDER.—Ordered, that a copy of the Resolution and of the Rules be forwarded to the Director of Public Instruction for information and guidance.

Ordered also, that a copy of the Resolution, as well as of the Rules, be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Govt. of Bengal.

TRANSFER RULES FOR COLLEGES.

I.—A student, before he is admitted to a college, shall be required to produce a transfer certificate from the Principal of the college in which he has last been reading. But if he applies at the beginning of a session, without having joined any other college, for admission to the first-year or to the third-year class, the certificate of having passed the last Entrance or First Arts Examination respectively shall be accepted in lieu of such certificate. A student who has failed at the First Arts or the B. A. Examination, and has not meanwhile joined any other college, may be admitted in the following session to the second or fourth-year class of the college, on production of the Registrar's receipt. The fact of his admission, with the date, should be written across the face of the receipt.

II.—The certificate shall run as follows:—

Certified that son of , an inhabitant of has been a student in the class of the College from to 18 . His character and conduct have been . All sums due by him to the College have been paid, including college fees up to . His scholarship of Rs. per mensem has been drawn and paid to him in this college up to . His attendance in each course of lectures is given below:—

Subject.	Number of lectures delivered.	Number of lectures attended.

Dated *Principal.*

III.—Application for a transfer certificate must be made, either personally or by letter (registered, if necessary) to the Principal of the college; and when so made the certificate is to be given without any avoidable delay. The only grounds on which it can be refused are (1) gross misconduct; (2) failure to pay the sums due to the college, including tuition fees and fines and transfer fee (if any). If a certificate is refused, the cause of refusal shall be notified in writing to the applicant.

IV.—Any instance of "gross misconduct" on the part of a student, whether followed by expulsion or not, must be at once notified to the Department, failing which no future action can be taken on it. A student expelled for misconduct cannot be admitted to another college without the express sanction of the Director of Public Instruction.

V.—For the purposes of the transfer certificate, the date on which a student presents his application for transfer, or the date of receipt of the letter (Rule III), shall be regarded as the date upon which his connection with a college ceased, and no fee shall be charged to him for any subsequent month. But if the student does not pay the sums due from him to the college within three days of his receiving intimation of their amount, he shall be treated as "absent without notice" until such sums are paid, subject (as regards any further sums so accruing) to the limit stated in Rule VI.

VI.—A student quitting a college without notice shall be liable to pay fees, together with fines for absence, for one month subsequent to that in which he last attended the college, after which his connection with the college shall be considered to have ceased.

VII.—A student quitting a college, except at the close of a session, shall be liable to pay a transfer fee before obtaining his certificate. The transfer fee shall not (except under special orders of the Department in the case of free colleges) exceed the ordinary monthly fee of the class.

VIII.—For students sent up to the First Examination in Arts or to the B.A. Examination, the session ends in May; for other students it ends in February, the month preceding that in which the new second and fourth-year classes are formed.

IX.—If a student withdraws from a college after the Durga Puja Vacation, he shall be liable to pay fees in that college up to the end of the session.

X.—A student shall not be sent up to the University examination until he has paid all sums due to the institution in which he has been reading, including fees up to the end of the session in May.

XI.—When a student has held a scholarship, free studentship, or half-pay studentship, under express stipulation in writing, signed by himself, that the whole or a portion of the sum drawn by or remitted to him shall be refunded to the college in case of withdrawal from it within a certain period, the transfer certificate may be withheld until the sums so due have been repaid, provided that the amount so claimed shall not exceed the amount actually drawn or remitted.

XII.—The transfer of Government scholarship-holders shall be subject to the previous sanction of the Director of Public Instruction, which will be withheld unless satisfactory reasons are assigned for the transfer.

XIII.—A student who has failed at the test examination (if any is held) of his college shall not be sent up to the University examination as a student of any other college.

XIV.—All questions arising between one Principal and another respecting the enforcement of these rules shall be referred as soon as possible to the Director of Public Instruction.

XV.—If a student be found producing a false document or making a false statement as to his attendance at any college, he shall be liable to expulsion and shall be reported to the Department.

XVI.—Wilful transgression or colourable evasion of any of the foregoing rules will render a college liable to forfeit the right of sending up candidates for senior scholarships and to be reported to the University for further penalties.

TRANSFER RULES FOR HIGH SCHOOLS.

I.—A student, before he is admitted to a high school, shall be required to produce a transfer certificate from the head-master of the school (of whatever class) in which he has last been reading. He should be accompanied by, or should present a letter of application from, his father or *bonâ fide* guardian, whose name should be registered in the admission book of the school. His father's name and place of residence should invariably be registered, in order to secure identification. If he has failed at the previous Entrance examination, and applies for admission in the following session without having joined any other school, the Registrar's receipt shall be accepted in lieu of a certificate. The fact of his admission, with the date, should be written across the face of the Registrar's receipt.

II.—The certificate shall run as follows:—

"Certified that , son of an inhabitant of was in the class of the school up to , and left with a character. All sums due by him to the school have been paid. He has (or has not) passed the annual examination for promotion to the class. His age on leaving is believed to have been years months."

Dated *Head Master.*

III.—Application for the transfer of a student must be made by his parent or *bonâ fide* guardian, either personally or by letter (registered, if necessary), to the head-master of the school which he is leaving; and when so made the certificate is to be given without any avoidable delay. The only grounds on which it can be refused are (1) gross misconduct, (2) failure to pay the sums due to the school, including schooling fees and fines and transfer fee (if any). If a certificate is refused, the cause of refusal shall be notified in writing to the applicant. If the certificate is not received within three days of the payment by the student of the amount (if any) due to the school, the matter may be referred to the Inspector of Schools, or to the Director of Public Instruction, as laid down in Rule XII.

IV.—Any instance of "gross misconduct" on the part of a student, whether followed or not by expulsion, must be at once reported to the Department, failing which no future action can be taken on it. A student expelled for misconduct cannot be admitted to another school without the express sanction of the Department.

V.—For the purposes of the transfer certificate, the date on which a student presents his application for transfer, or the date of the receipt of the letter (Rule III), shall be regarded as the date upon which his connection with the school ceased; and no fee shall be charged to him for any subsequent month. But if the student does not pay the sums due from him to the school within three days of his receiving intimation of their amount, he shall be treated as "absent without notice" until such sums are paid, subject (as regards any further sums so accruing) to the limit stated in Rule VI.

VI.—A student quitting a school without notice shall be liable to pay fees, together with fines for absence, for one month subsequent to that in which he last attended the school, after which his connection with the school shall be considered to have ceased.

VII.—A student quitting a school, except at the close of a session, shall be liable to pay a transfer fee before obtaining his transfer certificate. The transfer fee shall not (except under special orders of the Department in the case of free schools) exceed the ordinary monthly fee of the class.

VIII.—The session of each school ends in the month in which the annual examinations for promotion are held, and preceding that in which the new classes are formed. For students sent up to the Entrance examination, the session ends in May.

IX.—If a student withdraws from a school after the Durga Puja vacation, he shall be liable to pay fees in that school up to the end of the session.

X.—A student shall not be sent up to the Entrance examination until he has paid all sums due to the institution in which he has been reading, including fees up to the end of the session in May.

XI.—When a student of the first or second class has held a scholarship, free studentship, or half-pay studentship, under express stipulation in writing, signed by himself and his guardian, that the whole or a portion of the sum drawn by or remitted to him shall be refunded to the school in case of withdrawal from it within a certain period, the transfer certificate may be withheld until the sums so due have been repaid, provided that the amount so claimed shall not exceed the amount actually drawn or remitted.

XII.—The transfer of Government scholarship-holders and free students shall be subject to the previous sanction of the Inspector or Joint Inspector of Schools, or (in the case of schools attached to first-grade colleges) of the Director of Public Instruction, which will be withheld unless satisfactory reasons are assigned for the transfer.

XIII.—A student shall not, on admission to a school, be placed in a class higher than that in which he was in the school he has quitted, or if he has passed the annual examination for promotion, than the next higher class. This rule shall apply to admissions to the three highest classes. Thus, a student failing at the annual examination of the fourth class of one school cannot be admitted to the third class of another.

XIV.—If a student has been absent from a school for a full year, and if the Inspector of Schools or the Director of Public Instruction (*vide* Rule XII) is satisfied that his absence was not due to misconduct or rustication, the preceding rule may, with the sanction of the Inspector or the Director, as the case may be, be relaxed in his favour.

XV.—The fact of a student applying for admission without having undergone the annual examination of his old school must be regarded, unless the reverse is certified to by his former head-master, as sufficient evidence of his not having been fit for promotion. He should not therefore be admitted into a class higher than that in which he was in the other school.

XVI.—After admission under the foregoing rules, no student shall be promoted to a higher class before the next annual examination of the school. The application of this and the preceding rule shall be confined to the three highest classes. (See illustration, Rule XIII.)

Note (1).—It would be a violation of this rule to send up a student to the Entrance examination before he has been promoted in due course to the first class of the school.

Note (2).—The annual examinations are held at various times from December to February. In the case of a student admitted under Rule XV, the "next annual examination" means the annual examination held in the following session.

Note (3).—The annual examination will not be recognised in any school which has not been *bonâ fide* in existence from the beginning of the session.

XVII.—The *provisional* admission of a student to a school will not be recognised. No student will be regarded as belonging to a school unless and until his name is entered both in the admission book and on the register of a certain class.

XVIII.—A student who has failed at the test examination of his school shall not be sent up to the Entrance examination as a student of any other school, nor shall he be sent up to that examination as a private student.

XIX.—All questions arising between one head-master and another respecting the enforcement of these rules shall be referred, as soon as possible, to the Inspector or the Director (*vide* Rule XII).

XX.—If a student be found producing a false document or making a false statement as to his attendance at any school, he shall be liable to expulsion, and shall be reported to the Department.

XXI.—Wilful transgression or colourable evasion of any of the foregoing rules will render a school liable to forfeit the right of sending up candidates for junior scholarships, and to be reported to the University for further penalties.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o overcast, g gloomy, d drizzling rain, t thunder, ≤ lightning, p passing temporary showers, lr lightning reflection.

CALCUTTA, *the 19th May* 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE 16TH OF MAY 1890.

THE week commenced with fine weather over the whole province, pressure was very low but rising, temperature excessive in nearly all districts, normal circulation of winds obtained, the westerly winds in Behar extending as far as Bhagulpore and the south-westerly winds from the Bay over the greater part of South-West and East Bengal.

These conditions lasted on the eastern side of the province for one day only, for on the 11th a much more rapid rise of pressure in East Bengal as compared with that on the west caused strong easterly winds and probably an inrush of the moist winds which had followed the depression into Burmah a few days before. Rain began to fall in East Bengal on the 11th, but it was chiefly confined to Dacca, Furreedpore, and Tipperah. A few showers fell in North Bengal also, but these do not seem to be due to the same disturbance, as they were not numerous on the 10th, and continued to diminish in number and amount till the 12th. Meanwhile, in the other districts very hot dry weather prevailed, more especially in Orissa and South-West Bengal. On the 11th temperature fell rapidly except in South-West Bengal and along the extreme west, followed by variable changes on the 12th, and as the moist current spread over the province, causing storms in Behar and South-West Bengal on the 13th, the rapid fall extended to these districts, and by the 14th temperature was normal or in defect. On this day the disturbed conditions appeared in Orissa, and over South-West Bengal and the adjacent parts of Orissa and Chutia Nagpur northerly winds were blowing, gradients still continued steep from south-west to north-east, and from the general bearing of the wind directions, a steady current seemed blowing from North Bengal over the whole province. General rain was falling except in the northern districts of South-West Bengal, and by far the heaviest falls were in North Bengal and the Mymensingh district. Similar conditions obtained till the end of the week, pressure continued lowest over the west or south of the province, but from the 14th gradients slowly became less steep, though the wind circulation remained. Heavy showers fell and temperature underwent large and irregular changes, according to the nature of the storms as they occurred at the various stations. Pressure was falling during the latter part of the week, and though everywhere in excess, the difference from the normal was very slight in Orissa and about a twentieth of an inch over the nothern half of Bengal On Friday the 16th, a shallow depression was over the head of the Bay, but, though it may have caused the slightly cyclonic circulation at the neighbouring stations, it had little influence on the general weather which was everywhere recovering from the disturbance.

Thus during the greater part of the week, all the meteorological elements have been subject to large changes, and the unsettled weather has been general over the whole province during the last three days.

Pressure—On an average for the whole week has been a few hundredths of an inch above the normal, but this is due to the large upward and downward changes balancing one another. At one time the difference from the normal has been nearly two-tenths above, and at another as much below, while in the middle of the week differences from west to east were unusually large, giving steep gradients and the strong easterly or northerly winds which then blew. At first defect varied from ·1 inch to ·17 inch, but owing to the very rapid rise on the 11th in the north-east, defect on that day was generally below a twentieth of an inch. On the 13th there was a rapid rise in East Bengal and a slow rise along the northern limit and in Orissa; on the 14th the rise was rapid in the western districts and slow in East Bengal, after which there was a brisk fall on the 15th and 16th

Temperature—Was everywhere above the normal on the first day of the week by from 5° to 12° over the greater part of the province. With the commencement of the disturbed conditions local rapid falls occurred, the south-western districts being the last to feel the change. On the 11th the rapid fall extended over East and North Bengal and part of Behar. On the 12th it was confined to East Bengal, on the 13th to South-West Bengal and Orissa, and on the 14th to Chutia Nagpur, South-West Bengal, and Orissa; but on this day the fall in Chutia Nagpur exceeded 10°, and 4° over the greater part of the province. There was then a very large defect over the western districts, gradually diminishing towards the east, and it continued with very little change till the end of the week, when defect varied from 6° to 10°. The means for the week are all below the normal except those for South-West Bengal and Orissa.

Rainfall.—A few local showers were falling in North Bengal on the 10th, but elsewhere practically no rain fell. On the 11th showers became more numerous in East Bengal, and on the 12th rain was almost general, but beyond the local showers in North Bengal, it was still dry weather over the rest of Bengal. On the 13th general rain fell in all districts except Orissa, Chutia Nagpur, the west of South-West Bengal, and the southern half of East Bengal, and on the 14th it was falling at almost every reporting station. Rain fell off towards the end of the week in the western districts, but scattered showers continued and general rain in North and East Bengal. The average fall is above the normal in all districts except South-West Bengal, but defect in that district is only a tenth of a inch. The fall in North Bengal is 2·7 inches (more than an inch in excess), in East Bengal 2·5 inches, and in the other districts about one inch.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 16th of May 1890 :—

General remarks on the fluctuation of principal staples carried over the East Indian Railway during five weeks ended 29th March 1890.

INCREASES.

Cotton.—The large increase in earnings, as compared with weight carried, is attributed to considerable despatches having been made to Calcutta from stations above Cawnpore over long leads.

Gram and Pulses.—The increase is chiefly in despatches from stations on the Dinapore and Allahabad districts to Howrah, for shipment to Burmah.

Government Stores.—Principally in despatches of ammunition for Government from Howrah to Agra.

Iron.—This consisted chiefly of iron pipes and machinery for water-works at Allahabad, Agra and Delhi, from Howrah.

Oils.—Chiefly in despatches of kerosine-oil from Howrah to Jubbulpore, Agra, Delhi, and *vid* Ghaziabad.

Foreign Railway Material.—Chiefly in despatches from Howrah to Umaria and Umballa Cantonment.

Saltpetre.—Chiefly from the North-West Provinces to Howrah.

Seeds.—The improvement was due to a demand for linseed and mustard seed in Calcutta for export.

Timber.—Principally in despatches of sleepers and teak timber from Howrah to Mokameh Ghât and Agra.

Sugar (refined).—Large quantities were despatched principally from stations on the Shahabad district and Cawnpore to Agra, Delhi, *vid* Jubbulpore and *vid* Agra.

Bones.—Chiefly in despatches from *vid* Moghul Serai and Delhi to Bally.

DECREASES.

Coal and Coke.—There was an increase in weight carried attended with a decrease in the earnings.

Rice (husked and unhusked).—The continued absence of demand from the upper districts caused this decrease.

Hides.—The decrease was chiefly due to supplies having fallen short of actual requirements.

Opium.—This was due to smaller despatches from Patna and *via* Tari Ghât to Howrah.

No. 1493, dated Simla, the 10th April 1890.

RESOLUTION—By the Government of India, Finance and Commerce Department.

READ—

Letter from the Government of Bengal, No. 1088M., dated 14th May 1889.
Letter to ditto ditto, No. 3160, dated 20th June 1889.
Letter from ditto ditto, No. 292, dated 3rd February 1890, and enclosures.

During the progress through the Legislative Council of the Bill to amend Acts VI and VII of 1884, which became law as Act III of 1890 on the 21st February 1890, it was proposed by the Government of Bengal that the Bill should provide, in regard to inland steam vessels, that—

(1) tonnage should be substituted for nominal horse-power in sections 28 and 29 of Act VI of 1884;

(2) the certificates given to Masters and Engineers under the same sections should be divided into three classes instead of two as provided by the Act.

The effect of the proposed amendments was that, instead of certificates being granted to—

1st class Masters and Engineers for vessels of 80 nominal horse-power and upwards, and

2nd class Masters and Engineers for vessels of under 80 nominal horse-power,

certificates would be granted to—

1st class Masters for vessels of 350 tons gross and upwards,
2nd class Masters for vessels of 100 and under 350 tons gross, and
3rd class Masters for vessels of under 100 tons gross; and
Engineers for vessels with engines of 80 nominal horse-power or upwards;
Engine-drivers (1st class) for vessels of 30 and less than 80 nominal horse-power.
Engine-drivers (2nd class) for vessels of less than 30 nominal horse-power.

2. These proposals were made at so late a date that it was impossible to properly consider them without adjourning further progress with the Bill until the next session of the Council. For this reason, and because they were strongly opposed by some owners of inland steamers in Calcutta, the Bill was passed without the amendments proposed. It will be seen, however, from the proceedings in the Legislative Council of the Governor General, published in the *Gazette of India* of the 1st March 1890, that an undertaking was given that the questions raised should be fully considered in communication with the Local Governments; and the Governor General in Council now desires that the question may be taken into consideration, and that the opinions of the Local Governments may be expressed as soon as convenient after consultation with owners of inland steam vessels.

3. The issues arising out of the proposals are whether it is necessary that small steamers of the class of launches should, in respect of liability to survey and the possession of certificates of competency or service for their Masters or Engine-drivers, be subject in any way to the provisions of Act VI of 1884; and, if it is accepted that they should be subject to the Act in these respects, whether the proposals made by the Government of Bengal are proper, or whether any, and if so what, modifications should be made in them.

4. The state of the case at present is that in Burma and Bengal launches are surveyed under the rules for the survey of inland steam vessels sanctioned under Act VI of 1884—for Burma by the letter from this Department, No. 209, dated the 13th January 1890, and for

Bengal by letter No. 4, dated the 3rd January 1888. They can only ply under a certificate of survey, whether they are used for private purposes or for general traffic. In Assam no rules for the conduct of surveys have as yet been made under the Act, but surveys have been made under executive orders. In Bombay also no rules have as yet been sanctioned under the terms of Act VI of 1884.

5. It has been ascertained that in Bengal launches are generally surveyed, though a few, said to be solely employed for private purposes and not engaged in carrying passenger traffic, have not been surveyed as yet.

6. It should now be considered whether small steamers and launches should be exempted from the operation of the Act or brought under its provisions. If it is considered that exemptions should be allowed, it should be stated—

(1) whether only private launches and small steamers not plying for hire should be exempted, and if so, what should be the limit of exemption in respect of tonnage or horse-power;

(2) whether launches and small steamers plying for hire should also be exempted, and if so, at what limit in respect of tonnage or horse-power the exemption should be refused.

7. Next, as regards the requirement of certificated Masters, Engineers, and Engine-drivers, for Bengal and Burma rules for examination and the grant of certificates have been sanctioned—for Bengal by the letter from this Department, No. 455, dated the 27th January 1890, and for Burma by letter No. 209, dated 13th January 1890. For Bombay and Assam no rules have as yet been sanctioned.

8. It should now be considered and stated—

(1) whether any modifications in the rules for provinces where rules are now in force are required either as to total exemption of launches (the limits of exemption recommended being given), or as to exemption only of launches not plying for hire and solely employed for private purposes, and whether in provinces for which rules have not been sanctioned as yet it is desired that one or other exemption should be made; or

(2) whether the proposals of the Government of Bengal are accepted.

ENCLOSURES OF RESOLUTION NO. 1493 OF 1890.

No. 1088 (Marine), dated 14th May 1889.

From—W. B. BESTIC, ESQ., Under-Secy. to the Govt. of Bengal, P. W. Dept.,
To—The Secretary to the Government of India, Finance and Commerce Dept.

UNDER the provisions of Section 11 of the Inland Steam-vessels Act, VI of 1884, the certificate of survey, among other matters, specifies the number of passengers an inland steam-vessel is fit to carry, but there is no provision in the Act for the punishment of the owner or master of such a vessel for carrying passengers in excess of the number stated in the survey certificate. Cases having recently been reported to this Government of inland steamers carrying excess passengers, the Advocate-General was asked whether any legal action could be taken against the owners or masters of such vessels. A copy of the Advocate-General's reply* is enclosed, from which it will be seen that there is no law under which the carriage of passengers in excess of the number entered in the certificate of survey under the Inland Steam-vessels Act is made an offence *per se*

* Letter No. 210, dated 20th February 1889, from the Solicitor to the Government of India.

When the number of passengers carried is dangerous, action may be taken under Section 282 of the Indian Penal Code; but in a prosecution under the Penal Code, it would be necessary to prove the danger, which can in most cases be done only after an accident has happened, and in some cases not even then. In these circumstances, the Lieutenant-Governor is of opinion that it is very necessary that the Act should be amended, and a penalty provided for carrying excess passengers. Section 37 of the Native Passenger Ships Act, X of 1887, provides a penalty for carrying passengers in excess of the number allowed under the provisions of that Act. The Lieutenant-Governor considers that a similar provision should be inserted in the Inland Steam-vessels Act, and in his opinion a fine of Rs. 200 would be an adequate punishment.

2. In the Indian Steam Ships Act, VII of 1884, no penalty is provided for carrying excess passengers, and in the opinion of the Lieutenant-Governor it is equally necessary that a punishment should be provided for the offence in this Act also.

3. There is another point in the Inland Steam-vessels Act in connection with which an amendment is, in the opinion of the Lieutenant-Governor, necessary. Under section 28 (2) of the Act, an inland steamer having engines of under 80 nominal horse-power is required to have a second class master and an engine-driver or a man having both a second class master's and an engine-driver's certificate. This, in effect, means that such a vessel is required to have a native serang and a tindal who have passed very simple examinations. One of the Steamer Companies has taken advantage of this provision, and has built several steamers of 79 nominal horse-power. The steamers are of over 300 tons measurement; their boiler pressure is 100lb; they have twin compound engines, steam steering gear, steam starting gear, and steam windlasses. Under the Act, these steamers are placed on the same footing as regards the qualifications of the men in charge of them as the smallest steam launches. The men with the lower

certificates are not fit for the charge of them, but the examinations they are required to pass cannot be made more strict, as, were this done, the men in charge of the smaller steamers would not be able to pass them, and the owners of such steamers would be put to great expense in obtaining the services of men with higher qualifications than are required. The subject has received the Lieutenant-Governor's careful consideration in the light of the experience gained in working the Act, and His Honour has arrived at the conclusion that it is desirable that a second class master should not be allowed to have charge of a steamer measuring more than 200 tons gross, and that an engine-driver should not be allowed to handle engines of more than 50 horse-power. The matter is of great importance in Bengal, where the steamers plying on inland waters are very numerous, and I am directed to recommend that section 28 (2) of the Inland Steam-vessels Act should be amended so as to bring the size and horse-power of steamers, which can be in charge of men holding the inferior certificates, within the limits above specified.

No. 3160, dated 20th June 1889.

From—J. E O'CONOR, Esq., Assistant Secretary to the Government of India, Finance and Commerce Department,

To—The Secretary to the Government of Bengal, Public Works Department.

I AM directed to acknowledge the receipt of your letter No. 1088 (Marine), dated the 14th May 1889, suggesting—

(1) that the Inland Steam-vessels Act, VI of 1884, should be amended so as to provide for the punishment of the owner or master of a vessel for carrying passengers in excess of the number stated in the survey certificate;

(2) that a similar amendment should be made in the Indian Steam-ships Act, VII of 1884;

(3) that Section 28 (2) of the Inland Steam-vessels Act be amended so as to provide that a second class master shall not be allowed to have charge of a steamer measuring more than 200 tons gross, and that an engine-driver shall not be allowed to handle engines of more than 50 horse-power.

2. I am to state that the first of these amendments will be made by the insertion of a clause in the Inland Steam-vessels Act imposing a penalty for carrying passengers in excess of the number on the certificate.

3. As regards the second, I am to state that no amendment of the Indian Steam-ships Act is required, for no steam-ships surveyed under this Act could carry passengers in excess of the number stated on the certificate without being liable to the penalties imposed by the Native Passenger Ships Act, 1887, or the Emigration Act, 1883.

4. As regards the third, I am to say that the Governor-General in Council thinks that it is expedient to defer consideration of the proposal until the opinions of those engaged in the trade and interested in the question are ascertained. If the Government of Bengal considers the amendment to be really required, I am to suggest that this may be done, and the opinions obtained reported to the Government of India, together with fuller statement of the reasons for the proposal than are given in the letter under reply.

No. 292Marine, dated 3rd February 1890.

From—W. B. BESTIC, Esq., Under-Secy. to the Govt. of Bengal, P. W. Dept.,

To—The Secretary to the Government of India, Finance and Commerce Dept.

I AM now directed by the Lieutenant-Governor to reply to your letter [No. 3160], dated the 24th of June last, in which you communicated the views of the Government of India on the suggestions made by this Government for the amendment of the Indian Steam-ships Act, 1884, and the Inland Steam-vessels Act, 1884.

2. As regards the amendment of the Indian Steam-ships Act, which was proposed in my letter No. 1088M, in order to provide for the punishment of the owner or master of a vessel for carrying passengers in excess of the number stated in the survey certificate, I am to say, with reference to the remarks contained in the 3rd paragraph of your letter, that cases sometimes occur in which steamers carry passengers to and from Indian ports without becoming subject to the provisions of either the Native Passenger Ships Act, 1887, or the Emigration Act, XXI of 1883. It has, however, been ascertained that under the Order in Council, dated the 17th of October 1884, the carrying of passengers in excess of the number entered in a certificate granted under Act VII of 1884 is, in the case of a vessel not holding a certificate under one of the other Acts cited, an offence under the English Merchant Shipping Act, and under the circumstances the Lieutenant-Governor will not press the proposal.

3. The suggestion to amend section 28 of Act VI of 1884, so as to place a narrower limit on the size of inland steam-vessels which are allowed to be in charge of men of the lowest qualifications that may be prescribed by the rules made under the Act has, in accordance with the remarks made in the concluding paragraph of your letter, been referred to those engaged in the trade and interested in the question, and I am now to submit, for the information of the Government of India, copies of the letters* which have been received from the three principal Steamer Companies on the subject.

* 1. From Messrs. Kilburn & Co., dated the 3rd September 1889.
2. From Messrs. MacNeill & Co., dated the 3rd September 1889.
3. From Messrs. Hoare, Miller & Co., No. 6763—39078, dated the 6th September 1889.

If the Eastern Bengal State Railway be excluded, these three Companies may be said to have all the inland passenger traffic in their hands.

4. The Lieutenant-Governor does not propose to discuss all the questions raised by Messrs. Kilburn & Co. and Messrs. MacNeill & Co., as to do so would only confuse the issue in view. The object of the Government is not, as would appear to be supposed by these firms, to prevent them from employing natives on work for which they are fit, but to facilitate the employment of natives by reducing the standard of examination for the lowest class. The letter of Messrs. Hoare, Miller & Co. who represent the Calcutta Steam Navigation Company, Limited, contains a statement of the position to which no exception can be taken, and the proposal made in the concluding paragraph of their letter is entirely in accord with what is wanted. The Lieutenant-Governor would even make the tonnage limit a little less strict than that proposed by them, so as not to interfere with the steamers now running on the Brahmapootra. Messrs. Kilburn & Co. submit a similar proposal, but they deprecate the substitution of tonnage for horse-power in fixing the limits up to which masters of the different classes may hold charge.

5. The Lieutenant-Governor is advised that the nominal horse-power of the engines of these steamers bears no fixed ratio either to the real power of the engines or the size of the vessels, and this being the case, the "*nominal horse-power*" is not for the purpose of determining the size of the steamer which a master of a certain class should be allowed to command a proper criterion. On the other hand, the gross tonnage of a steamer varies with her size, and does therefore appear to be the proper point to consider in determining the class of master that is required to take charge of any given vessel Gross tonnage has accordingly been taken in lieu of nominal horse-power in determining the classes of master in the proposals contained in the following paragraph.

6. After consideration of the representations of those interested in the trade, the Lieutenant-Governor has arrived at the conclusion that Messrs. Kilburn & Co.'s suggestion is quite to the point, and that the amendment of the Act should take the form of dividing the masters into three classes, the first to be qualified for the charge of inland vessels of any tonnage, the second for the charge of vessels of under 350 tons. and the third of the charge of vessels of under 100 tons. His Honour would in the same manner divide the engineers into three classes, the first to be qualified to take charge of any engines, the second of engines of under 80 nominal horse-power, and the third of engines of under 30 nominal horse-power.

7. In framing the rules for the examination of each class, the qualifications required of the first class would be such as only Europeans and Eurasians would ordinarily possess. The standard required of the second class would be such as natives who have served in the smaller vessels might readily attain, and for the third class an examination of a very simple description would be prescribed.

8. The limit of 350 tons gross for second class masters includes all steamers now plying in Bengal in charge of native commanders, and the limits proposed for the several classes of engineers are the same as those which are suggested by Messrs. Kilburn & Co. The imposition of these limits will not result in any unnecessary interference with the existing trade, and the Lieutenant-Governor trusts that they will be accepted by the Government of India and prescribed in the amending Bill which is now before the Legislative Council.

9. The Lieutenant-Governor has in separate letters * proposed other amendments, and there remains only one point to which His Honour desires to draw attention. The Act does not provide for the issue of "certificates of service," and the Lieutenant-Governor has reason to believe that when the rules, whether revised in accordance with the amendments proposed in this letter or not, for the examination of masters and engineers are strictly enforced, cases will arise in which the want of power to issue "certificates of service" may inflict hardship on individuals and cause unnecessary interference with the inland steamer trade. The Lieutenant-Governor would therefore recommend that the Act should be amended so as to provide that the Local Government may, at its discretion, issue "certificates of service" to men who have commanded or driven inland steam-vessels for a period of three years, the certificates in each case to be for the class to which the steamer which the man has commanded or driven belongs.

* No. 114 (Marine), dated the 10th January 1890.
No. 122 (Marine), dated the 18th January 1890.

10. With the several amendments that have now been proposed, the Lieutenant-Governor believes that the Act will meet all requirements for some time to come, and His Honour trusts that the present opportunity will be used to attain so desirable a result.

Dated 3rd September 1889.

Bengal Government's letter No 1760 (*Marine*).

WE have the honour to acknowledge the receipt of your No. 1212 of the 31st ultimo, handing us a copy of the above-quoted letter on the subject of second class masters and drivers.

1. As the matter is an important one to us, we may be pardoned if we go into the question fully, and trust to prove satisfactorily that the apprehensions of Government regarding the danger to life and property are entirely unfounded.

2. The policy of the Government in the employment of native labour has always been progressive; but as the proposal before us seeks to deal with the subject in a retrogressive spirit, we append an account of the steps by which the gradual employment of trained native employés has attained its present dimensions in our service. Act I of 1868, which is the earliest to our knowledge dealing with the subject under review, enacted that native drivers, after passing an examination before a duly appointed Board, were entitled to work engines up to 50 N. H. P. No rules were laid down regarding the examination of serangs; but it appears that somewhere towards 1880 the Port Office examined and granted certificates to men for plying within the limits of the Port of Calcutta, restricting the holders of these certificates to vessels of 100 tons. These certificates, we understand, are informal ones, and were only intended to apply to serangs of steam-launches plying in a crowded port such as Calcutta. Act VI of 1884 (the Inland Steam-vessels Act) took up the position of both commanders and engineers, and made provision for the granting of certificates to second class masters (serangs) and engine drivers (tindals). The 50 N. H. P. limit of 1868 was raised to 80 N. H. P. in 1884, rightly so, as in the interim larger steamers and more powerful engines had been constructed, and men had become more accustomed to the increased size and power. Not only this, but a higher average of intelligence obtained among the class of natives serving in these steamers under European supervision. Unfortunately, although Act VI of 1884 provides for the class of men who shall be empowered to take charge of vessels up to 80 N. H. P., no *Rules under the Act* which define the examination these men have to pass have yet been published. We fear this has had something to do with the re-opening of the question, and it will be remembered that we were compelled recently to address the Government on the deadlock that ensued from our not being able to send up fully competent men for examination owing to the non-formulation of the necessary rules.

3. In 1870 this Company first essayed natives in independent charge in a small steamer working as a feeder in Assam. About 1874 another steamer was constructed. In 1882 three more were added to the fleet intended to be worked solely by natives. The experience gained in these five vessels gave us every confidence in the ability of trained natives to command the smaller class of steamers, and in 1885 this Company secured the contract for the carriage of Her Majesty's Mails to Cachar. Eight steamers were then built; and from that date down to the present time a daily Mail Service has been maintained by steamers wholly commanded by the men who are stigmatised in the letter now under review as being unfit for the posts that they have held with credit for years. The other large Steamer Companies, who will doubtless speak for themselves, have been running a daily Mail Service to Assam since 1883, without the loss of a single boat, with steamers similarly commanded. We give a short list of the vessels in this Company's service alone (apart from launches plying in Calcutta) now commanded by natives, and showing gradual development of the trade:—

Built in	1870	...	...	*Naseera.*
,,	1874	...	...	*Gauhati.*
,,	1882	...	...	*Tura. Kohima, Nowgong.*
,,	1885	...	...	*Lark, Linnet, Robin, Thrush, Ganesa.*
,,	1886	...	...	*Mavis, Wren, Swift, Starling, Jagannath.*
,,	1887	...	...	*Balaram.*
,,	1888	...	...	*Egret, Gannet, Ibis.*
,,	1889	...	.	*Penguin, Petrel, Heron.*

Every one of these vessels has been commanded by natives from the time it was launched, and we are pleased to say that every vessel is still afloat and engaged in active service. From the time when we first placed natives in charge, we have never lost a steamer in their charge, never had any serious collision involving loss of life, and never had a boiler explosion. We regret to say it, but we very much wish that we could make the same statement with regard to our European staff.

4. Directing our attention to the letter now before us, we notice the words "a Steamer Company which has taken advantage of this provision (80H P.) and has built several steamers of 79H.P." We do not know whether this is intended to apply to us; but as we *have* built several steamers of 77H.P., we may perhaps consider the allusion is intended for this Company. We fail to see how we have merited the implied censure in "taking advantage of this provision." The Act clearly lays down the limit "under 80N. H.P.," and in constructing steamers of 77N. H.P., we are no more taking advantage than a man on 80 days' leave would be taking advantage if he rejoined on the 77th day.

5. It was on the faith of the 80H.P. limit, passed in 1884, that, having tried larger steamers commanded by Europeans without success, we constructed steamers representing a block value of 9 lakhs in 1888-89, all strictly within the provisions of what could not in any way be termed hasty legislation. Now that these steamers are constructed and are running with success, if the same legislature reverses its own decrees and reverts to the limit of 50H.P.—the limit of 1868—21 years ago, it is we who would suffer the hardship and have serious grounds for complaint.

6. We need not point out to Government the injustice to those who have embarked enormous capital in a particular trade, should such a reversal of policy be actually enforced, especially when the reasons for such a reversal are shown not to be borne out by the broad facts of the case. We would also respectfully call attention to the fact that such a policy would be entirely against the progressive spirit of the age. All are familiar with the strides that have

taken place in Industrial India within the last twenty years, and we may perhaps be allowed to point to Indian railways where the avowed policy of Government is to advance the employment of natives as they prove their fitness for the work. The reports of the Directors of State and Guaranteed Railways year after year unfailingly refer to the larger employment of native drivers who have been trained to posts of responsibility.

7. The letter goes on to say: "These steamers are of over 300 tons measurement; their boiler pressure is 100lb; they have twin compound engines, steam-steering gear and steam windlasses." This statement is a curious mixture and betrays want of acquaintance with facts. None of the "300 tons" steamers has twin compound engines. Out of the 22 steamers mentioned in our list, 6 are of 300 tons measurement, or 101 tons register; 3 only have twin compound engines; 6 have steam steering gear and steam windlasses (in addition to hand-gear), and which, it is needless to say, forms an important element of safety instead of danger as seems to be implied. As for the boiler pressure of 100lb, this is the normal pressure of all ordinary marine boilers, whether in a launch of 5 H. P. or in a large steamer of 1,500 H. P. The difference between them lies, not in the pressure, but in the area over which that pressure is distributed.

8. Later on the letter proposes a restriction to a certain tonnage and horse-power—"with a view to avoid the risk to human life and property that is at present incurred." We quite fail to understand how any case is made out to support this assertion. No Company in India has had the long and varied experience that we claim to have had, and the fact that for four years we have had, besides all the older steamers enumerated in native command, eight steamers running a daily passenger and Mail Service under all conditions of weather, without a single case of loss of life and property, appears to us the most conclusive evidence of the erroneous character of the charge that we could offer. We may perhaps remind Government that before men are placed in positions of trust, they pass through a long and varied training under our European commanders and engineers. All have been many years in our larger steamers before we place them in independent charge of the smallest vessel, and they then are promoted to larger vessels according to their ability and trustworthiness. It so happens that at the present moment our steamer, the *Heron*, is towing the *Rhotas*, with His Honour the Lieutenant-Governor and party. This steamer is commanded by one of the men whom the letter states are unfit to command vessels of this class. The serang in question, we may remark, has been in independent command since 1872. During this long period of seventeen years he has never had a single accident which has resulted in loss of life or property, which is supposed to be endangered by his presence on board.

9. It must not be thought from the foregoing remarks that our object is to obstruct Government in its laudable desire to safeguard life and property. Our interests are at one with them, as in any serious accident we should ourselves be the severest sufferers, none of our block being insured. Apart from this, a serious disaster would cause distrust in the minds of the travelling public, upon whom our revenue depends and who are principally ignorant people who would not seek to enquire into cause, but would only see results. Our principal traffic is with this class—natives who will travel if they can travel cheaply, but who would otherwise not travel at all by steamer. It is only by the closest economy in working that many of our services can be maintained. To impose the additional tax incurred in the services of highly-paid European labour would result in the closing of the lines at immense inconvenience to the public and to ourselves. The receipts would not stand it.

10. The Government, we take it, are in the difficulty of being unable to determine the *primâ facie* fitness of a man whether to run a small launch or to be entrusted with a large steamer such as we employ. As the Act at present stands, the second class master's certificate is applicable to both. We quite see that a man who may very well do the one may be incompetent to do the other, and we therefore venture to offer a suggestion which we think may get over the difficulty. Let the "first class master" stand as at present; there is no question about him. Divide the native element into two classes—"second class master" and "serang," the first to command up to 80N. H P., and the second launches and small craft up to, say, 30 N.H.P. The introduction of a short clause in the Act would then solve the whole difficulty.

11. In the Rules under the Act, "the second class master" should be examined by two persons specially appointed to hold such examinations at stated intervals. One of the examiners should be an official of the Port Office, the other a Marine Officer of either of the Inland Steam Services duly qualified as a first class master. The qualifications of a second class master might be as follows:—(1) He should produce certificates showing that he has served as principal serang in an inland steamer under first class master for a period of, say, two or three years. (2) He should pass the test in colours, rule of the road, the ship channels of the Hooghly, the routes of the Sunderbuns, and the general handling of a steamer in emergencies.

12. The "serang in charge" might be examined in the simple rules of navigation by the Harbour Master's Department.

13. We think that some such rules as these would satisfy Government that only capable men were placed in positions of trust, and end the discussion that has cropped up in one form or another for some time past and in which our interests are involved.

14. If thought necessary, "native drivers" could also be divided in the same manner into first and second class drivers, the former limited to 80 N. H. P., the latter to 30 N. H. P.

15. We deprecate the introduction of a further complication by making "tonnage" a basis. All along N. H P. has been the test both in the Acts of 1868 and 1884. We do

not see that there would be any advantage in altering this, and trust that this certain factor will remain the test of a steamer's capacity.

16. We shall feel much obliged if the Commissioners will give our views as here expressed their careful consideration, and pass them on to Government with such comment as they may deem necessary.

Dated 3rd September 1889.

From—MESSRS. MACNEILL & Co., Agents, Rivers Steam Navigation Co., "Ld.,"
To—The Secretary to the Port Commissioners.

We beg to acknowledge receipt of your letter of 31st ultimo, enclosing copy of one, No. 1760 (Marine), dated 3rd idem, from the Government of Bengal, with reference to the proposed amendment of section 28(2) of the Inland Steam-vessels Act, which provides that an inland steam-vessel having engines of under 80 nominal horse-power is required to have a second class master and an engineer possessing an engine-driver's certificate, and asking for our opinion with reference thereto.

We have fully considered the matter in question, and have no hesitation in saying at the outset that the form the present proposal takes is the very reverse of what our experience would have led us to expect as advisable in the general interests of the devolpment of inland steam navigation in Bengal. For our Directors are so satisfied with the experience this Company possesses of the results attending the use of natives, under strict European supervision, on their vessels, that they contemplated requesting permission from Government to run special coal vessels manned by natives only, so as to meet the requirements of the Assam coal trade, which has recently assumed considerable proportions; and apart from the requirements of the trade, the principal argument this Company could use in support of such a request would be the success that has hitherto attended the exclusive use of native serangs, and the difficulty of obtaining in any number the services of competent Europeans for the same work.

Our experience of working steamers with natives goes back as far as 1882, when we built two small vessels of 60 tons, both of which ran regularly on the Hooghly, and afterwards as feeder steamers in Assam waters, and from that time to this, when these steamers are still running in charge of natives, no accident of a serious nature has happened to either of these vessels. As our principal experience of the working of inland steam-vessels by natives, however, we would refer to those carrying the Assam mails on the Brahmaputra, subsidised under contract with the Secretary of State for India. The steamers of this line, which were originally nine in number, were designed and built, with the knowledge of Government, with the express idea of being run in charge of natives, and on no other understanding could this Company have contracted with Government for a period of years as it did. This line of steamers was afterwards increased to thirteen, again to seventeen, and now consists of twenty vessels, which maintain a daily service on the Brahmaputra between Goalundo and Debrooghur and *vice versâ*. This service started in 1884. When it ran daily between Dhubri and Debrooghur only and up to this time, it has not become responsible for any loss of life or serious accident of any kind. During the whole of that period these vessels have been in the charge of native serangs and of native tindals, except when we have found it advisable (when adding to the fleet vessels of a new type) to have a European engineer in charge, until we were satisfied that a native might with safety take his place. At present only four of the twenty vessels previously referred to are in charge of a European engineer, and these engineers we expect to relieve very shortly. No doubt the use of natives alone in charge of steamers on such a large scale as we have described was by some considered experimental, but our experience of over five years, in our opinion, fully justifies the experiment, and it may not be out of place to mention that our principal Executive in Assam, who has superintended the Mail Service since it started, and has also controlled the working of our larger vessels, considers that there are several of the native serangs in question who are now fully competent to take charge of our largest vessels with flats in tow. Under these circumstances, therefore, it certainly would not seem to us inadvisable were we permitted to increase the responsibility of these serangs, and in making such a suggestion we do not for a moment overlook the necessity of doing everything in our power to secure the proper and safe working of the vessels of this Company. Assuming for the sake of argument that we had to put European commanders on all the boats on the Assam Mail line, to do so would require all the fifteen commanders of our large steamers as well as the five passed men we have in reserve. It is needless to say that a change of this kind, at the present day, would completely paralyse the working of this Company's vessels.

We received a similar reference to the one now under reply from the Secretary to the Chamber of Commerce, to which we deferred replying until receipt of some particulars called for from Assam, including independent testimony in support of our opinions; but to meet the wishes of your Vice-Chairman, we send you this our reply this afternoon. Should any fresh information of value reach us from Assam, we presume we have your permission to address you again on the subject.

No. 6763—39078, dated 6th September 1889.

From—MESSRS. HOARE, MILLER, & Co., Managing Agents, Calcutta S. N. Co., Ld.,
To—The Secretary to the Port Commissioners, Calcutta.

We have the honour to acknowledge the receipt of your No. 1241 of the 4th instant, handing us a copy of Marine Department's No. 1760, dated 3rd August 1889.

1. Before the passing of Act VI of 1884, native serangs could take charge of steam-vessels not exceeding 100 tons gross register tonnage according to Act VII of 1879, and certificated native engine-drivers could take charge of vessels of 50 nominal horse-power according to the rules under Act I of 1868, published on 12th September 1877 and 5th September 1881. By Act VI of 1884, a vessel under 80 nominal horse-power but of indeterminate tonnage may be commanded by a second class master, but rules for the examination of second class masters which the Local Government is empowered (Act VI of 1884, section 29) to frame have not yet been issued, and, consequently, no examinations have been held nor certificates granted for second class masters.

2. We have the honour to suggest that rules be now issued for the examination for certificates of competency of second class masters. These rules should state the tonnage for which the certificates may be granted, and should be so framed as to ensure that only those, whether European or Native, competent to undertake the duties will be able to obtain certificates.

3. In order that it may not be incumbent on owners to place a second class master in charge of a small steam launch, provision may be made for permitting the issue of certificates to serangs to command steam-vessels up to 100 tons, as is done at present by the Calcutta Port Office.

4. The rules for examination of engine-drivers under Act I of 1868, which are practically identical with those under Act VI of 1884, were unsuccessful in selecting the most desirable men, they being usually unable even to keep their engines in good working order without the continual assistance of fitters and vicemen, although these drivers are perhaps sufficiently reliable to take charge of small engines, and might therefore be still allowed to take charge of engines up to 50 nominal horse-power, it being clearly unnecessary that men with the knowledge and attainments which would be requisite to enable them to take charge of engines of 80 nominal horse-power, accompanied by auxiliary machinery, should be in charge of ordinary high pressure launch engines of (say) 5 nominal horse-power.

5. If the rules under Act VI of 1884, according to which engine-drivers' certificates are granted, are so amended as to select men with some knowledge of the construction and repairs of engines, there would be no reason why engines of 80 nominal horse-power should not be entrusted to the engine-drivers who would be able to obtain such certificates.

6. If the masters of the smaller vessels are divided into second class masters and serangs, and certificates granted to second class masters to command vessels of 200 or 300 tons, and to serangs to command vessels of 100 tons; and if the engine-drivers' certificates are similarly granted for 80 nominal horse-power and 50 nominal horse-power, the conditions of eligibility for examinations, and the examinations themselves, being commensurate with the responsibilities which the certificated men will be called upon to undertake, we are of opinion that the present difficulty will be removed, and that thoroughly reliable men can be found.

THE British Admiralty has given Notice (No. 181 of 1890) that on the 20th March 1890, and during the construction of two break-waters in Yokohama bay, lights would be exhibited from light-vessels placed to mark the East and North break-water heads, and to guide vessels entering or leaving the harbour through the fairway between them :—

The East break-water will extend in a northerly direction about nine cables from a position about one cable north-eastward of Nakamura Gewa (creek in foreign settlement) entrance, eastern part of Yokohama. The North break-water will extend in a south-east direction about $1\frac{1}{10}$ miles from a position about two cables eastward of the east angle of Kanagawa fort. A channel for boats will be left between the inner end of either break-water and the shore.

EAST BREAK-WATER LIGHT-VESSEL shows a fixed *green* light, elevated 32 feet above the sea, and visible in clear weather from a distance of about four miles. The vessel, painted green, with a green ball at the masthead, is moored in five fathoms water, about one cable eastward of the break-water head.

NORTH BREAK-WATER LIGHT-VESSEL shows a fixed *red* light, elevated 32 feet above the sea, and visible in clear weather from a distance of about four miles. The vessel, painted red, with a red ball at the masthead, is moored in five fathoms water, about one cable eastward of the break-water head.

NOTE.—Vessels entering or leaving the harbour must pass between the light-vessels, which are about one cable apart. Entering, they should, to clear the break-water heads, steer West (as nearly as possible) for a distance of at least two cables after passing the light-vessels, and when leaving, steer East for at least two cables before coming to the light-vessels.

CORPORATION OF CALCUTTA.

First Publication under section 415, Act II of 1888 of Bye-laws passed by the Commissioners in Meeting and awaiting confirmation under section 414.

J. COWIE,
Secretary to the Corporation.

Section 412—(*d*) *The conditions under which persons shall be permitted to drive registered carts.*

7. He* shall give correct information about his own name, age and residence, the name and residence of the owner, the place where the cart is ordinarily kept and such other particulars necessary to establish his own identity and that of the owner of the cart as he may be required by the Registering Officer to state at the time of each half-yearly registration.

8. He must carry with him, when plying for hire, the cart license for the then current half-year, and produce it whenever required for the inspection of all Municipal and Police Officers and the hirer of the cart.

(*e*) *Regarding the height and mode of construction of buildings.*

Re building of portion of old buildings.

1. Whenever any old masonry building has been taken down to an extent exceeding one-half of such building, such to be measured in cubic feet, the re-building of the portion thereof shall be deemed to be the erection of a new building, and such portion shall be subject to the regulations of the Act and to the bye-laws respecting new buildings.

Construction of outer walls and foundations.

2. Every masonry building shall have its outer walls constructed of brick or other hard and incombustible substance, and the foundation shall be the solid ground, or concrete, or other solid substructure on which the footings shall rest.

Footings to walls.

3. Every person who shall erect a new building shall construct every wall of such building so as to rest upon proper footings. He shall cause the projection at the widest part of the footings of every wall on each side of such wall to be at least equal to *one-third* of the thickness of such wall at its base, unless an adjoining wall interferes, in which case the projection may be omitted where that wall adjoins. All walls of houses intended to be used as dwelling houses shall have a damp proof course at or above the level of the ground floor.

He shall also cause the diminution of the footings to be in regular offsets, or in one offset at the top of the footings, and he shall cause the height from the bottom of the footings to the base of the wall to be at least equal to *two-thirds* of the thickness of the wall at its base.

* The two immediately preceding bye-laws which have already been confirmed are:—

5. When loading or unloading goods in streets which admit of the passage of two carts abreast, the carter shall rest his cart alongside of the footpath with one of its wheels touching the curb stone.

6. He shall light his lamp as soon as it becomes dark and obey all reasonable orders of the Police on duty.

4. In the case of any building exceeding one storey in height, every wall shall be properly bonded and solidly put together with mortar, and no part of such wall shall overhang any part underneath it, and all return walls shall be properly bonded together.

All walls and return walls to be bonded together.

This rule is not intended to apply to cornices or mouldings where otherwise admissible.

5. Every wall and every return wall of such building shall be of such thickness as may be considered safe by the Commissioners having regard to the height of the buildings, the materials of which it is constructed, and the purposes to which it will be put; provided that is shall not be lawful for the Commissioners to require more than is required by Appendix I.

Thickness of walls.

6. All beams and girders shall be supported by a sufficient breadth of brickwork, stone or other solid substance to secure the stability of such beam or girder.

Support of beams and girders.

7. The roof of all buildings shall be externally covered with some incombustible material. Also every gutter shoot or trough in connection with the roof of such building shall also be constructed of incombustible materials.

Roofs, skylights, &c., to be of incombustible material.

8. Every person intending to construct an oil, flour or soorky mill or an iron foundry shall, at the time of applying for sanction to the erection thereof under section 236 or 247, distinctly state that the building or hut will be used for that purpose.

9. Any person obtaining approval to build under section 238 or section 247 shall construct the house or hut in accordance with the plan approved of by the Commissioners. No prosecution under this bye-law shall be commenced without the sanction of the Commissioners.

For new huts built in bustees under Section 247.

10. In any bustee when new huts are being added under section 247 to existing ranges or clusters of huts, they shall be so erected as to block up no existing roads or paths, and so as to keep as far as practicable in line with the existing main lines of huts which are to be taken as directing lines. In no case shall the roadway left between two new huts, or between a new hut and an existing hut, be less than nine feet in width.

11. If new ranges of huts are being erected they shall be built in regular lines with a road or path of a minimum breadth of nine feet between every two lines. The direction of the lines will be determined by the Commissioners in accordance with the position of the land, the preference being given to footpaths running due north and south.

12. Any road as above terminating in a *cul de sac* shall have a sufficient space at the end not less than 15 feet in width to enable a conservancy cart to turn round.

13. Such roads shall remain private property, but shall be kept open for the passage of conservancy carts, without thereby conveying any right of property in them to the Municipality.

14. No new huts shall be erected at a greater distance than 100 feet from the nearest part of one of the above roads unless otherwise specially sanctioned by the Commissioners.

15. The space between the walls of any two new huts or of any new hut and any adjacent existing hut or building shall not be less than three feet for ventilation. But this rule will not apply to two or more huts built in continuation and composing one "bari."

16. Every new hut which may be built abutting on a road or footpath, whether public or private, shall be so built as not to project on the road or footpath, and also shall be so constructed as not to allow rain-water from its roof to fall upon or injure the same.

17. No new huts shall be erected unless sufficient privies have been provided to allow of at least one privy for common use to every 100 residents.

18. By section 247 every new hut must have a plinth at least two feet above the level of the centre of the nearest public road, but this will not suffice unless the ground on which it stands is also sufficiently raised to admit of surface drainage.

19. Such surface drains may be required by the Commissioners for the drainage of all new huts as the circumstances of the bustee and the position of the nearest sewer may render practicable.

20. When any new drain has to be constructed for the benefit of any hut or huts, the owners of which are tenants-at-will, notice will be served on the owner of the land, and if the drain is constructed by the Commissioners in default, he will be charged with the cost thereof, but if such drain fall into subsequent disrepair after construction, the owner of the hut or huts for whose benefit the drain was constructed shall be charged with the cost of its repair.

21. Every person who re-builds the sides and roof of any hut shall apply to the Commissioners for approval thereof under section 247.

(*f*) *Regarding ventilation and the extent to which space must be left for the free circulation of air as required by the provisions of section 243 of Act II (B.C.) of 1888.*

1. With respect to masonry buildings which are to be newly erected on any site previously unbuilt upon, the following provisions shall have effect, namely:—

The foundation of any such building shall not be constructed on any site which has been filled up with street or other refuse, unless such refuse is either properly removed or unless a period of

20 years has elapsed from the date when the refuse was deposited.

Provided that, with the consent of the General Committee, the period of 20 years may be reduced to not less than 10 years if the state of the soil after investigation is found to be such as to admit of it.

2. No new masonry building which abuts on a street of a less width than 40 feet shall be erected to a greater height than two storeys without the special consent of the Commissioners in meeting.

3. Every such building intended to be used as a dwelling shall be so constructed that the whole of at least one side of every room thereof shall either be an external wall or abut on an interior open space or on a verandah. Such interior open space shall have an area equal to not less than one-fourth of the aggregate floor area of all the rooms abutting thereon, and shall not be in any direction less than 6 feet across. Such external wall shall, where it faces a street of less than 16 feet in width, have between it and the boundary line of the owners' premises an open space of not less than 2 feet in width. At the sides it may be attached to the adjacent premises, but if not so attached at the sides and in every case at the back, it shall have a space of 4 feet along the whole side of the building between it and the boundary line of the owners' premises or between it and the inner edge of the boundary wall, if that boundary line is a wall. And every open space, whether exterior or interior, required by this clause, shall be and be kept free from any erection other than a boundary wall and shall be open to the sky, and shall be and be kept open to access from each end thereof.

4. Every open space or interior court-yard referred to in the above rule shall be raised at least one foot above the level of the nearest street, so as to admit of easy drainage into it.

5. Every room intended to be used as a dwelling room in any such building, except a room in the roof thereof, shall be in every part at least 10 feet in height from the floor to the ceiling.

6. Every such room shall have a clear superficial area of not less than 80 square feet.

7. Every such room shall be ventilated by means of doors or windows which open directly into the external air or into a verandah and have an aggregate opening equal to not less than one-fifth of the superficial area of the side of the room which faces an open space.

8. The Commissioners may exempt from the provisions of clauses (*e*) or (*f*) any particular building or class of buildings to which the rules or any particular rule may appear to them to be inapplicable.

(*g*). *Drainage, cess-pools, privies, cow-houses and stables.*

1. No privy connected or unconnected shall be constructed underneath a dwelling room.

2. All connected privies and urinals shall be constructed, so that one wall at least shall be an outer wall of the building.

3. All soil pipes shall be c
building and ventilated by mean
the foul gases above the highest
building.

4. Separate cisterns shall be conse
connected privies. No tap or draw-of
affixed to any pipe between the cisterns
privy or urinal.

5. All waste pipes and overflow pipes of
terns shall terminate in the open air, and be c
off from all direct communication with drains.

6. The privy room shall be thoroughly ventilated and well lighted by windows opening directly into the external air or into a verandah.

7. No person shall throw, deposit, or discharge any sewage into any river, tank, khal, watercourse, drain, or receptacle for water, or dispose of any offensive matter in any other way than as the Commissioners in meeting may from time to time direct.

8. In cases where for any special reason the Commissioners sanction the keeping of a licensed public latrine or depôt for the collection of sewage, every licensed keeper of such public latrine or depôt shall construct such public necessary or depôt in such manner and with such out-offices and appurtenances as the Commissioners shall from time to time determine. No public latrine or depôt shall be closed without the sanction of the Commissioners in meeting.

9. Every keeper of a public latrine or depôt shall provide himself with such number of tubs and carts as the Commissioners may deem necessary for the stowage and removal of sewage, and such tubs and carts shall be supplied by the Commissioners at the charge of the said keepers, at such prices as the Commissioners shall from time to time fix.

10. Every keeper of a public latrine or depôt shall maintain the tubs and carts which may be supplied to him under the preceding bye-laws in good and proper order.

11. Every holder of a license for the keeping of a public latrine or depôt shall make floors, drains, and seats of his privy pucca, if required so to do by a written notice, and shall construct or provide such receptacles for the sewage as the Commissioners shall require, and shall provide a sufficient supply of water to keep the same in a cleanly state.

12. Every holder of a license for the keeping of a public latrine or depôt shall keep a register of all servants employed in the management of his latrine or depôt, and for the removal of sewage therefrom, in such form as the Commissioners shall direct, and shall produce the same when called upon, and shall supply such servants with such tickets or badges as the Commissioners shall from time to time direct.

15. Everything hereinbefore contained relating to the lighting, drainage, ventilation, cleansing, paving and water-supply of cow-sheds and dairies shall apply to stables in which more than six horses or draught cattle or any buffaloes are stalled, and the owners and occupiers of such stables shall be liable to the penalties hereinbefore provided for breaches of the provisions of this Act by the owners and occupiers of cow-sheds and dairies.

(*m*). *Securing the cleanliness of milk-stores, milk-shops, and milk-vessels used for keeping or conveying milk.*

1. Every cow-keeper selling milk shall keep the milk in a separate dairy or milk-house, and

such dairy or milk-house shall be used for no other purpose, and shall be properly lighted, ventilated and paved to the satisfaction of the Commissioners, and shall not communicate directly with any drain or be so placed that the effluvia from any manure heaps or the like can penetrate into it.

2. The walls, shelves and flooring of every dairy shall be kept constantly clean, and all vessels in such dairy shall be properly washed and kept in a state of complete cleanliness.

3. No occupation productive of dust or smell of any kind shall be carried on in any such room used for the sale or storage of milk.

4. No person suffering from any loathsome, contagious, or infectious disease shall engage in keeping or conveying milk for sale, or shall enter any dairy or milk-store.

5. Every person occupying a milk store shall provide for use therein a sufficient number of receptacles made of non-absorbent material for the reception, storage and delivery of milk, and shall cause them to be at all times kept thoroughly cleansed and purified, and shall cause all milk to be removed without delay from the cowshed to a properly paved, lighted and ventilated dairy room.

(*n*). *The inspection and management of burial and burning grounds.*

1. All graves must be at least six feet in depth, but no masonry grave constructed after the 1st of September 1886 shall be used for a second interment unless there is space for five feet of earth between the top of the second coffin and the surface of the ground. For masonry graves constructed before that date, three feet of earth shall suffice as heretofore.

2. No person shall build or dig, or cause to be built or dug, a grave in any burial-ground at a less distance than two feet from any other existing grave.

3. No person shall build or dig, or cause to be built or dug, a grave in any burial place in any other line than that specially marked out by the Superintendent to the Burial Board for the purpose; or, in the case of cemeteries not under any Burial Board, by the Commissioners.

4. No grave other than a masonry grave shall be opened for a second interment within a period of ten years, without the special permission of the Burial Board, or, in the case of cemeteries not under the Board, by the Commissioners.

5. No one shall carry a corpse, or part of a corpse, through any highway unless it be decently covered and concealed from public view.

6. The Commissioner of Police shall have power to order the exhumation of bodies whenever such exhumation is deemed necessary by him for police purposes, informing the Burial Board when the disinterment is in any cemetery under their control. In all other cases the sanction shall be given by the Burial Board, or in the case of cemeteries not under any Burial Board, by the Commissioners.

7. No person, while carrying any corpse, or part of a corpse, through the precincts falling within municipal limits shall deposit it on or near any public highway except for the purpose of ordinary relief.

8. No person shall cause to be removed any corpse, or part of a corpse, that has been kept or used for purposes of dissection, otherwise than in a close vehicle, and in such manner as may prevent any offensive odour, and at such hours as may be fixed by the Commissioners in meeting. Nothing contained in this section shall apply to the removal of a body by the relatives of a deceased person after a Coroner's inquest.

N.B.—Rules 1, 2 and 4 shall not apply to the interment of Mohamedans or Hindus unless specially made applicable to them by the Mohamedan Burial Board

FOR BURNING CORPSES AT THE BURNING GHATS.

1. The Sub-Registrar of every municipal burning ghât shall live in the immediate vicinity of the ghât, and shall cause a board, containing his name and official designation, to be placed in some conspicuous portion of his dwelling house.

2. Every corpse brought to a burning-ghât, without being accompanied by a certificate in the form prescribed in section 190, Act II (B.C.) of 1888, shall be examined forthwith by the Sub-Registrar, without touching the corpse, who, upon being satisfied that death has resulted from natural causes, shall enter, without fee, in the register kept for the purpose, the particulars specified in the abovementioned form, every such entry being made in order from the beginning to the end of the book. When a corpse is accompanied by a certificate from a Registrar or Medical Officer, the Sub-Registrar shall file such certificate, and then permit the corpse to be burnt.

3. If the Sub-Registrar has any reason to suspect that death has not resulted from natural causes, he shall send immediate intimation thereof to the nearest police-station, and in the meantime withhold permission to have the corpse burnt. Where there is no reason for such suspicion, the corpse shall be burnt within four hours after its arrival.

4. The Sub-Registrar shall see that no corpse, or portion of a corpse, shall on any account be allowed to be thrown into the river. He shall take particular care that no corpse, or portion of a corpse, except the navel, shall remain without being completely reduced to ashes, or be removed in any other condition. The charge to be made for the burning of a body will be on a scale laid down by the Commissioners.

5. The Sub-Registrar shall submit to the Health Officer a weekly return every Monday of all deaths registered at the ghât. This return shall contain the particulars specified in schedule 11 of Act II (B.C.) of 1888, and shall be accompanied by the certificates granted by the several Registrars or medical men during the week separately arranged in different bundles according to the several wards to which they relate.

6. The Sub-Registrar shall be very careful to see that all the belongings of a corpse, such as clothes, mats, bed and bedding, &c., brought with the corpse, are burnt, and none of the aforesaid things shall on any account be allowed to be removed from the ghât by the Domes or any other person. This prohibition shall not apply to any shawl or other valuable apparel brought with dead bodies.

7. Corpses may be burnt both during the day and night, but the Sub-Registrar in charge of the ghât shall see that the ashes and sweepings

are removed daily, and that the burning-ghât is always kept clean.

8. The Sub-Registrar shall allow persons to burn the corpses of their friends and relatives, each according to the rites of his religion, without any interference.

9. No child or fœtus is allowed to be buried on the riverside.

10. The Domes in charge are strictly prohibited to drink spirituous liquors within the burning-ground enclosure, or to be in a drunken state when on duty. The Sub-Registrar shall see that this rule is strictly enforced. He shall also remove from the burning-ghât all persons who are drunk or disorderly.

11. All persons connected with the burning-ghât must be civil and attentive to those who come there to have dead bodies burnt.

12. All remains of corpses, which have been dissected, as also those upon which a Coroner's inquest has been held, shall be brought to the ghât in a closed vehicle and burnt at night.

13. The contractor, who supplies the necessaries for burning corpses, shall not be allowed to charge more than the rates specified below.

14. The Brahmin shall not demand any fee, gratuity or reward other than that authorized by the Commissioners for the performance of the necessary religious rites, and it shall be his duty to attend immediately on being sent for at all hours of the day or night, and to officiate as priest and cause the performance of the ceremony, and he shall be considered to be a servant of the Commissioners for the purpose of this rule.

15. The Brahmin shall on no pretence enter within the walled enclosure of the burning-ground, except when called by the relatives of deceased persons to officiate as priest, nor shall he remain therein after his services are completed.

16. Should the Brahmin demand any fee, reward or gratuity of any kind whatever in excess of the fee fixed in the tariff, or enter the enclosure except when sent for, or remain therein after his services have been completed, or after he has been required by the Sub-Registrar or other officer of the Municipality to quit the same, or fail to attend when sent for, he shall be liable to dismissal at the discretion of the Commissioners and to be ejected from the burning-ground. Provided always that no person coming to burn a corpse will be prevented from bringing with him his family priest should he prefer to have the cremation ceremony performed by him. In such a case, however, the party who brings his own priest to the burning-ground shall be bound to allow the Brahmin his usual fee.

17. The contractor shall at all times keep on hand a sufficient supply of fuel and the other necessary articles named in the tariff; should he fail to do so, or neglect, or refuse to supply the same at any hour of day or night, or fail to keep his shop open at all times for the purpose of supplying the same, or use false or short weights, or supply inferior or unsuitable articles or create any disturbance within the limits of the Commissioners' lands, his license shall be cancelled, and he shall be summarily ejected from the land and be further liable to criminal prosecution as a trespasser.

18. Persons coming to the ghât for burning dead bodies shall be bound to purchase all the articles named, and the quantities specified in the tariff, from the contractor. But they will be at liberty to provide themselves with whatever else they may require for cremation, as also all the articles therein named but in excess of the quantities specified in the tariff, or, when the contractor fails to supply them, from wheresoever they like; and the contractor shall not on any account interfere with persons bringing articles for burning dead bodies from outside.

CALCUTTA, *the 27th May*, 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE 23RD OF MAY 1890.

WEATHER during the week has been very uniform in character, pressure distribution remaining practically unchanged, while easterly winds have been very prevalent except in Orissa and Chutia Nagpur, and scattered or general rainfall in all districts every day of the week. The rainfall in East and North Bengal at this season is much heavier than at the commencement of May, from the irregular incursion of moist winds from the east, when the monsoon may be said to have commenced. But generally these conditions do not extend as far as the western districts. During the past week the almost constant east winds have brought a larger proportion of these moist masses of air and very showery weather has been general in South-West Bengal and Orissa, while in North and East Bengal considerably less rain has fallen than in an average year. The rainfall and changes of temperature have been irregular, the latter depending on the former; but pressure has hardly changed, and light winds have been blowing throughout the week. The usual distribution of pressure has been as follows:—low pressure over Chutia Nagpur and sometimes over Orissa and the head of the Bay, and the highest pressure in North or East Bengal, so that isobars have been running north and south or from north-west to south-east, the easterly winds being due to this arrangement, and therefore the rainfall also. As the winds became less easterly the rainfall seemed to diminish, and there was a very marked difference on alternate days at the beginning of the week. On Saturday and Monday, with the gradients running from north-west to south-east and strongly easterly winds, showers were much more general than on Sunday and Tuesday, when the gradients were from north to south and the easterly circulation not so marked On Wednesday the weather was more unsettled, and almost general rain fell in all districts, while on Thursday pressure was low over Behar, and normal conditions were beginning to appear; but from the irregular winds still blowing in Lower Bengal on that day, a few scattered showers continued to fall. On Friday ordinary weather prevailed, and a few showers fell in North Bengal only.

Pressure—Continued uniformly above the normal by amounts varying up to seven-hundredths of an inch till the last two days of the week, when excess was almost everywhere below a twentieth of an inch. The means for the week are, therefore, all above the normal by about a twentieth of an inch in North Behar and two to three-hundredths of an inch in all other districts. Pressure changes have almost without exception been under a twentieth of an inch, the only case where this has been exceeded being the fall of ·07 inch in the north-west corner of the Bay on Wednesday.

Temperature—Has generally been below the normal, and variations have been large and irregular owing to the variable character of the rainfall. At the commencement of the week there was defect of six or seven degrees in the centre of Bengal and of under five degrees in the outer districts, and this defect has continued in the western districts, but in the east and north occasionally high temperature has occurred as rainfall decreased in amount. The means are all below the normal, very slightly in Assam, by about 1° in East Bengal and Orissa, by 2° in North Bengal, South Behar, and Chutia Nagpur, and by nearly 3° in South-West Bengal and North Behar. These means shew how irregular the temperature distribution has been, as even after the smoothing process great diversity remains.

Rainfall—Has been nearly an inch in excess in Orissa and South-West Bengal, as much in defect in East and North Bengal, a third of an inch above the normal in North Behar, slightly below in South Behar, and normal in Chutia Nagpur. Some heavy falls are reported from the Midnapore district, the heaviest being 6·4 inches at Contai and 4·8 inches at Tumlook; the heaviest in South-West Bengal 4·1 inches at Ialgola in the Moorshedabad district and over 3 inches in Nuddea and Jessore. In East and North Bengal the showers were very scattered, and falls are rarely over 2 inches. In North Behar general rain fell on Monday and scattered showers on the two following days, but for the rest of the week practically no rain fell there, as in South Behar for the whole week. Showers were most numerous in Chutia Nagpur on Monday and Thursday, but only three stations—one in Lohardugga and the other two in Singbhoom—received more than one inch.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

REVENUE DEPARTMENT.

A Dictionary of the Economic Products of India.

BY DR. GEO. WATT, C.I.E.,

Reporter on Economic Products.

Published under the authority of the Government of India in the Revenue and Agricultural Department.

The first two volumes of this work are now ready for issue, and intending subscribers are invited to register their names with the Superintendent of Government Printing, Calcutta.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular, and European names; habitat or source; history; properties and uses, both chemical and industrial; trade statistics; markets, &c. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross references so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks, and with a reference to the original publication. Numerous contributions have, however, furnished the results of new discoveries, and confirmed the vernacular names; so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal pages; Volume II embraces the letter C in 689 pages; Volume III is in course of preparation, and will contain the letters D, E, F, and G. The whole work will, it is expected, be completed in six volumes by 1891; but a seventh volume may also be issued consisting of an index to all the vernacular and other names contained in the Dictionary; and this as a work of reference, it is hoped, may prove of considerable value.

The price to subscribers will be in India Rs. 30 and in England 2 guineas, *payable in advance*, for the complete set An extra charge for packing and postage will be made for the set—in India, at 8 annas per volume, and for England at 2 rupees 6 annas per volume.

For copies bound in half calf or half morocco, Rs. 6 and 8 shillings respectively will be charged extra for the whole sets.

*** *No copies will be issued to non-subscribers till the work is complete, and no single volume will be sold separately. The price to non-subscribers will be Rs. 45 in India, and 3 guineas in England, exclusive of packing and postage.*

CALCUTTA, *the 3rd June*, 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE 30TH OF MAY 1890.

THE general character of the weather during the present week is very similar to that of the preceding one, easterly or south-easterly winds with cloudy skies and frequent showers prevailing throughout the week. Pressure has been almost always below the normal, a low-pressure area continuing with very little change to the west of the province, and hence causing the almost uninterrupted indraught from east to west, to which is due the more than usually moist air in the western districts. As stated last week, there is towards the end of May a larger proportion of moisture in the air over East and North Bengal than in the early months of the hot weather, and this has been displaced in consequence of the easterly winds, a smaller proportion of rain falling in North Bengal, while in most of the western districts the rainfall has been above the normal. In the early part of the week, the change for the better, that had set in at the end of the last week, lasted for one or two days only Pressure continued to fall briskly for the first two days, and easterly winds recommencing, showers were frequent on Sunday and Monday in all districts except Behar. On Monday the 26th, gradients were steeper from east to west than on any other day of the week, and though pressure was changing more slowly, the rise in the eastern districts and the fall in Behar and Chutia Nagpur was causing increased difference of pressure over the province. On Tuesday rainfall was very scattered in the lower districts, but was much more general in North Bengal and Behar, and frequently heavy in the latter. After this, pressure rose in Behar and fell in the east, so that greater uniformity prevailed, and wind velocity, which had been increasing while the gradients were steep, fell off considerably in all districts, and the scattered showers were chiefly confined to East Bengal and parts of South-West and North Bengal. Temperature in consequence of the continued cloudy weather has been lower than is usual at this season of the year, and changed rapidly but irregularly as the area of rainfall changed. The largest difference from the normal was in Behar on Tuesday when the heavy showers fell there. At the end of the week unsettled conditions appeared to be developing over the Bay: wind velocity fell off at the head of the Bay and increased at Diamond Island, but, though the rough sea reported from Burmah and Orissa showed that squally weather was beginning somewhere in the Bay, it died away without otherwise affecting the coast.

Pressure—Has been falling on five days out of the seven, but changes being generally small, the difference from the normal has never been greater than a tenth of an inch. The difference of pressure from west to east in the middle of the week was two-tenths of an inch, but this arrangement was for one day only. On the last day, the 30th, very uniform pressure prevailed, the greatest difference between the extreme east and west not exceeding a twentieth of an inch The mean pressure for the week is everywhere below the normal, defect being largest in Assam, and exceeding a twentieth of an inch at Silchar and Dhubri. It is least in North Behar and the west of South-West Bengal, and in the other districts averages about three-hundredths of an inch.

Temperature—Has been below the normal in all districts except Assam, where there is excess of more than 1°. Defect is largest in North Behar, amounting to 3°, and in South Behar and South-West Bengal is over 2°, but elsewhere it is under 1°; 0·9° in Orissa, 0·8° in East Bengal, 0·4° in Chutia Nagpur, and 0 3° in North Bengal. Changes have at times been very large, but generally irregular, depending on the rainfall at the various stations. The most rapid were in Behar on Wednesday, when there was a general fall of over 5° and a defect in some cases exceeding 10°. This was followed by a rise of about 5° on each of the two following days, and by the end of the week the distribution did not differ much from the normal.

Rainfall—Was general in all districts, except Behar, on Sunday and Monday, and again on Wednesday in Orissa, South-West and East Bengal. Heavy rain fell in Behar on Tuesday and in Chutia Nagpur on Friday. The rainfall distribution has, therefore, been irregular, but from the occasional heavy falls, the means for the week have as a rule been very nearly normal or above it. In North Bengal only there has been a considerable defect, as last week, the easterly winds having carried the moisture more to the westward than is usual at this season of the year. The defect in North Bengal is 1 inch, in Chutia Nagpur nearly half an inch, while the fall in North Behar is practically normal and slightly in excess in the other districts except East Bengal, where it is very nearly 1 inch. Some of the heaviest falls are—Balasore 4 inches, Satkhira, Bagirhat, and Nakipore, between 4 and 5 inches, Burrisal 4 inches, Fenny 4·6 inches, Naraingunge and Munshigunge 5·5 inches, Chumparun 4·8 inches, and Barrabhoom 3 3 inches.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 30th of May 1890 :—

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

General remarks on the fluctuation of principal staples carried over the East Indian Railway during four weeks ended 26th April 1890.

INCREASES.

Cotton.—This satisfactory increase is a continuation of that obtained through the season, despatches having been made chiefly from the cotton-despatching stations above Cawnpore and from stations on the Bombay Baroda and Central India Railway *viâ* Agra to Calcutta.

Gram and Pulses.—This was in despatches of gram, khassaric and collie from stations on the "R," "B," and "C" districts to Howrah and Burdwan for stocks and local consumption.

Iron.—The improvement under this head was due chiefly to despatches of cast-iron pipes from Howrah for the water-works at Allahabad, Agra, and Khatmandu in Nepal.

Opium.—This increase was in crude opium sent for manufacture to the Government factories at Patna and Ghazipur from different stations on the "R," "B," and "C" districts.

Railway Material, Foreign.—Chiefly consisted of permanent-way material despatched from Howrah for the Bengal-Nagpur and the Delhi-Umballa-Kalka Railways.

Salt.—There was a decrease in the weight carried attended with an increase in earnings; but there was an increase both in weight and earnings in the despatches of Liverpool salt from Howrah to stations on the Tirhoot State and the Bengal and North-Western Railways. This increase in weight was counterbalanced by decreases in the re-booking of Kheura salt from Patna, and in the receipts of Sambhar salt *vid* Agra and *vid* Hathras at stations in the North-West Provinces.

Saltpetre.—The increase in this staple was chiefly in despatches from the Tirhoot State Railway *vid* Mokameh Ghât, and from *vid* Moghalsarai, Ghaziabad and Delhi to Howrah for export to Europe and China.

Seeds.—There was a falling off in the weight carried attended with an increase in earnings; the former was due to heavy despatches last year of short lead traffic in mustard and rape, poppy and linseed to Bombay from stations on the Oudh and Rohilkhand Railway passing Aligarh and Hathras junctions. The increased earnings were obtained from long distance despatches of mustard and rape seeds from stations on the "B" and "C" districts to Howrah for local consumption, and for export to Bombay.

Sugar (refined and unrefined).—There was a decrease in the weight attended with an increase in earnings, the falling off in weight was in short lead despatches from the North-Western Railway *vid* Ghaziabad to stations on the Bombay Baroda and Central India Railway passing Delhi; also from the Oudh and Rohilkhand Railway *vid* Aligarh and *vid* Cawnpore to Agra.

Bones.—The increase in this article was chiefly in despatches from *vid* Moghal Serai *vid* Asansol, Mokameh Ghât, Agra and Delhi to Bally and Chitpore.

DECREASES.

Piece goods, European.—The decrease was chiefly in despatches from Howrah to Cawnpore and Delhi.

Gunny-bags.—A limited demand for bagging wheat and seeds accounts for this falling off.

Wheat.—The falling off was chiefly in despatches from stations on the "D" district to Howrah, owing to absence of demand for export due to high rates of exchange.

Rice (husked and unhusked).—This is a continuation of the decrease reported in previous months.

Other rain and spring crops.—The decrease was chiefly in oats from Bhagalpur to Howrah for shipment, and in jowar grain from the North-Western to the Bombay Baroda and Central India Railway *vid* Ghaziabad and Delhi.

Hides.—The decrease in despatches from all the principal despatching stations due to short supplies.

Tobacco.—Chiefly in the receipts of this commodity from the Eastern Bengal State and Assam-Behar State Railways *vid* Naihati and Shahebgunge respectively.
